SUMMARY

Software Engineer with 3+ years of production experience specializing in Laravel/PHP backend development, REST APIs, workflow automation, database optimization, and AI integrations. Experienced building and maintaining production systems for a U.S.-based HVAC service platform, including AI-powered calling automation, automated communication workflows, large-scale search optimization, and React-based technician tools — with no reported customer-facing disruption across releases.

EXPERIENCE

Software Engineer — Axel Technologies Pvt. Ltd. Aug 2023 – Present

Calicut Cyberpark, Kerala — Promoted from Associate Software Engineer

Core backend contributor on **P3***, a large-scale production HVAC platform built for a U.S.-based HVAC service company — working across Laravel APIs, AI automation, and deployment infrastructure.*

> **FLAGSHIP PROJECT**
>
> **Athena — AI Calling Assistant (Laravel + Vapi)**
>
> Architected and shipped an AI-powered calling workflow that automates customer follow-up and appointment scheduling — handling call initiation, customer data, call outcomes, and recording storage, with results surfaced through a client-facing reporting dashboard.

PLATFORM & API DEVELOPMENT

- Engineered Laravel backend services and REST APIs that power the P3 mobile application and technician-facing tools.
- Delivered technician tools within the React/Supabase-based **P3 Toolbox**, including ID Pro (AI-driven HVAC equipment identification via the OpenAI API) and Repair vs Replace (logic-based repair/replacement guidance), with integrated Razorpay payments.
- Designed and independently built a Laravel-based office management application for car-rental and staff operations.

AUTOMATION & INTEGRATIONS

- Designed and implemented a Laravel-based email/SMS automation engine supporting **100+ business workflow conditions**, removing a significant source of manual operational work.

DEPLOYMENT & INFRASTRUCTURE

- Migrated production deployment workflow from manual FTP releases to Git-based, version-controlled deployment, while supporting server and database upgrades through a production migration completed with **zero reported customer-facing disruption** — earning direct client appreciation.
- Diagnosed and resolved production issues spanning PHP configuration, AWS dependencies, and deployment environments.

MOBILE & OFFLINE-SYNC DEVELOPMENT (Ongoing)

- Building a Flutter-based mobile application for P3 to deliver a seamless offline/online experience, using Firebase alongside real-time data sync to the P3 web platform's database, along with development of the supporting REST APIs.

RECOGNITION & LEADERSHIP

- Received the **Best Performance Award** for outstanding contribution.
- Conduct **technical interviews** for engineering candidates, assessing backend skills.

> **Software Engineer, Client Assignment** — Workpex (subsidiary of Axel Technologies) May 2025 – Nov 2025
>
> - Optimized CRM and lead-management search performance across datasets containing millions of rows.
> - Implemented automated lead-status updates, lead-value reporting, and dynamic filtering on the Laravel/MySQL backend.
> - Returned to Axel Technologies on client request following completion of the assignment.

TECHNICAL SKILLS

Backend	PHP, Laravel, Lumen, REST API Design, Eloquent ORM, Auth & Sessions, Workflow Automation
Frontend	React.js, JavaScript, Redux / Redux Toolkit, HTML, CSS, SCSS, Bootstrap, Axios, React Router
Database	MySQL, SQL, Supabase / PostgreSQL, Query Optimization & Indexing, Large-Dataset Search
AI & Integrations	OpenAI API, Vapi, Razorpay, Third-Party API Integration
Tools & Deployment	Git, Composer, npm, Linux / Ubuntu, Server Configuration & Troubleshooting, Production Release Support
Mobile	Flutter, Firebase (offline-sync application development, in progress)

Familiar with: Node.js, Next.js, TypeScript, MongoDB, AWS

KEY PROJECTS

Athena — AI Calling Assistant (Laravel, Vapi, AI Integration)
Automated customer follow-up and appointment scheduling with dashboard-based call logs, results, and recordings.

P3 Toolbox & ID Pro (React, Supabase, OpenAI API)
Technician-facing tools including AI-based HVAC equipment identification from a scanned nameplate.

Client Communication Automation (Laravel, PHP)
Automated email/SMS engine handling 100+ workflow conditions for recurring client communication.

Workpex CRM / Lead Management (Laravel, MySQL)
Search optimization across millions of rows, automated lead-status updates, dynamic filtering.

EDUCATION

Bachelor of Computer Applications (BCA) 2023 – Present
Indira Gandhi National Open University (IGNOU) — Pursuing 6th semester, currently working on final project

Diploma in Electronics and Communication
AKNM Government Polytechnic College (GPTC), Chelari, Malappuram

Higher Secondary Education 2016 – 2018
PPTMYHSS, Cherur, Malappuram
